ARCH STREET SIDEWALK PROJECT

PITTSFORD, VERMONT

The Arch Street Sidewalk Project will create new pedestrian facilities to provide cohesiveness and safe pedestrian access throughout the Village center. The project area is a well-traveled pedestrian route for school children and elderly residents of Village Manor, in addition to the general public.

There are several key features within the project area benefit from a complete pedestrian facility network, including the Lathrop School on Pleasant Street, Village Manor and the Pittsford Library on Arch Street and the Historical Society on Route 7. There are existing sidewalk networks on Route 7 and the western end of Arch Street that provide access to the Village center. However, prior to the project there were no sidewalks on Arch Street from Village Manor to Pleasant Street or on Pleasant Street.

Dufresne Group designed the project for construction expected to in Spring 2014. This project consists of approximately 2,400 linear feet of new sidewalk and curb on Arch Street and Pleasant Street including drainage modifications, crosswalks and a 280 linear foot long segmental block wall. The project design alternatives are asphalt sidewalk with concrete curb and concrete sidewalk with granite curb. Once bids are received for the project, the Town will decide on the sidewalk and curb materials based on the available budget.

KEY FEATURES

- Funded by VTrans Local Transportation Facilities Program.
- Provides connectivity between existing sidewalks on Arch Street and Route 7.
- Alternative evaluations including a recommendation to extend the project area to Route 7 to provide full connectivity through the Village center.
- Evaluated the existing drainage patterns and designed storm drain systems on Arch Street and Pleasant Street to provide positive drainage.
